

Wireless Printing Instructions

1. **Have a laptop and want to print?** This is all you need to do: Once you are logged into our wireless network RC-CAN, go to the following URL (*be sure to type the <http://> part*):

- Archibald Library - <http://192.168.2.10:30044/clientlauncher/>
- Biane Library - <http://192.168.3.10:30044/clientlauncher/>

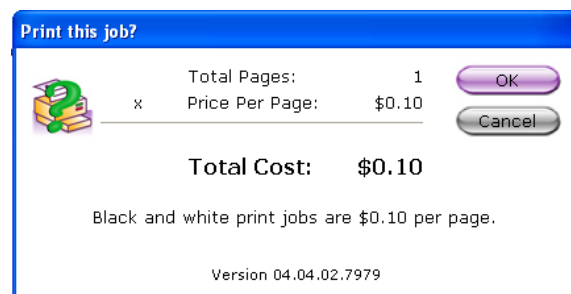

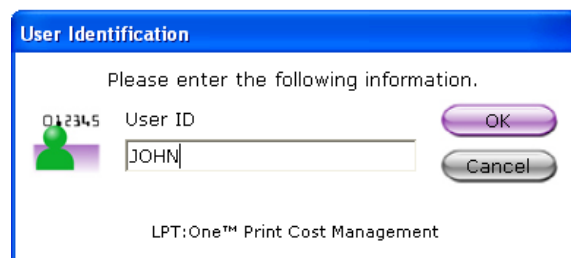

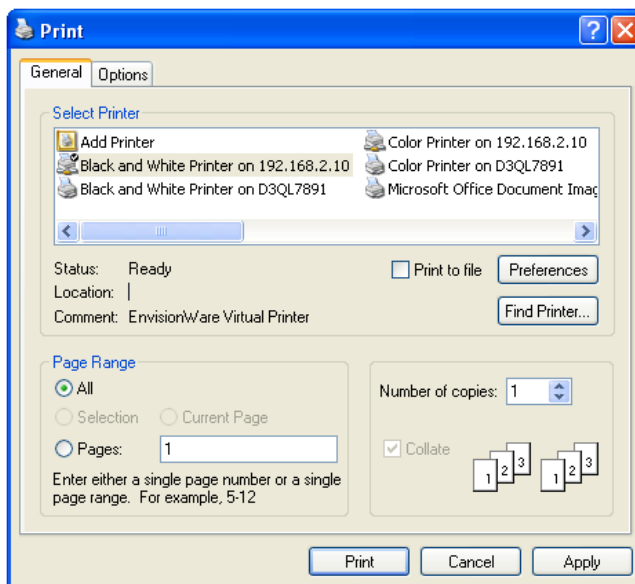

2. When you see the screen below, click on the link to run the Print Client.

3. Click on **Run** when you are asked if you want to run or save a file. Click on **Run** on the screen that warns about an "Unknown Publisher". Click on **Allow** if you are told that "An unidentified program wants access to your computer".

4. Click on **Accept** if you see an End User Agreement box, and wait until the message that says "Please wait – registering with print service" disappears.

5. Click on **File, Print** from the menu of the application you're using. In the Print dialog box (below, left), choose either **Black and White Printer on 192.168.x.10** or **Color Printer on 192.168.x.10**, then click **Print**.

6. You'll be asked to enter a **User ID** (above right). Type your first name and click **OK**. Click **OK** when you see the "Print this job?" screen with the total cost. Click **OK** when you see the "Print Complete" screen with the message "Your job has been received."

7. Go to the **Print Release Station**. When it asks for your library card number, type in your first name. You'll see your print jobs and be able to print them as usual.

8. When you're ready to shut down the computer, click on **Stop Print Client** if you see this box on your screen. If you get the message "This program might not have installed correctly", just click **Cancel**.

If you have any questions, ask at the Information Desk and we'll be happy to help you.
